

Problem 1: Student Details

Question

Create a class named `Student`.

Requirements:

- Create a static block that prints:

None

`Student Management System Started`

-

Create an instance block that prints:

None

`Student Object Created`

-

Declare the following instance variables:

- `id`
- `name`
- `course`
- In the `main()` method:
 - Create two student objects.
 - Assign values using the object reference.
 - Print the details of both students.

Expected Output

None

`Student Management System Started`

`Student Object Created`

`Student Object Created`

```
Student 1
ID : 101
Name : Ravi
Course : Java
```

```
Student 2
ID : 102
Name : Priya
Course : Python
```

Problem 2: Employee Information

Question

Create a class named `Employee`.

Requirements:

- Create a static variable:

Java

```
companyName = "ABC Technologies";
```

- Create a static block that prints:

None

```
Company Information Loaded
```

- Create an instance block that prints:

None

```
Employee Object Created
```

- - Declare instance variables:
 - `empId`
 - `empName`
 - `salary`
 - In the `main()` method:
 - Create three employee objects.
 - Assign values using the object reference.
 - Print the company name and employee details.

Expected Output

```
None
Company Information Loaded

Employee Object Created
Employee Object Created
Employee Object Created

Company : ABC Technologies

Employee 1
ID : 101
Name : Rahul
Salary : 45000

Employee 2
ID : 102
Name : Sneha
Salary : 52000

Employee 3
ID : 103
Name : Arjun
Salary : 60000
```

Problem 3: Mobile Information

Question

Create a class named `Mobile`.

Requirements:

- Create a static variable:

Java

```
brand = "Samsung";
```

- Create a static block that prints:

None

```
Mobile Store Opened
```

- Create an instance block that prints:

None

```
Mobile Object Created
```

- Declare instance variables:
 - `model`
 - `price`
 - `color`
- In the `main()` method:
 - Create two mobile objects.
 - Assign values using the object reference.
 - Print all mobile details.

Expected Output

None

```
Mobile Store Opened
```

```
Mobile Object Created
```

```
Mobile Object Created
```

Brand : Samsung

Mobile 1

Model : Galaxy A55

Price : 35000

Color : Black

Mobile 2

Model : Galaxy S24

Price : 75000

Color : Blue
